Announcement of Revised Medium-Term Management Plan

We hereby announce that our board of directors resolved at its meeting held on November 9, 2023 to revise the medium-term management plan (from the fiscal year ended March 31, 2023 to the fiscal year ending March 31, 2025), which we announced on June 3, 2022, as follows.

Details

1. Background for Reexamining Our Medium-Term Management Plan

As an important period for laying the foundation for realization of our “VISION 2030”, the medium- and long-term business strategy frame that represents the future vision of our group, we have formulated the medium-term management plan covering the three-year period starting from the fiscal year ended March 31, 2023 to the fiscal year ending March 31, 2025, and have implemented various measures to achieve this plan. However, the business environment remained challenging against the backdrop of significantly rising inflation and the depreciation of the Japanese yen, and as a result, our business results for the fiscal year ended March 31, 2023, the first year of the plan, fell significantly short of our expectations. In light of such circumstances, we have decided to reexamine the strategies, target figures, and timeframe of the medium-term management plan in order to ensure the achievement of goals under “VISION 2030”.

2. Policies of Revised Medium-Term Management Plan

1.	Business Model Reforms to Improve Profitability Implement business model reforms (including supply chain management reforms and cost structure reforms) and restore core profitability
2.	Growth Strategy to Achieve “VISION 2030” Execute “brand strategy” and “customer strategy” by leveraging the digital capabilities and our strengths to achieve the next stage of growth
3.	Introduction of Return on Invested Capital (“ROIC”) Management Introduce ROIC management as a business management platform that supports measures to enhance profitability and the effectiveness of strategies
4.	Promotion of Asset-light Strategies Improve capital efficiency by reducing inventories and cross-shareholdings, and liquidating real property

3. Target Figures and Timeframe

【Target Figures and Timeframe for the Last Year of the Medium-Term Management Plan】

	Before Revision	After Revision	“VISION 2030”※
	Fiscal Year ending March 2025	Fiscal Year ending March 2026	Fiscal Year ending March 2031

Revised Medium-Term Management Plan FY2024 to FY2026

November 9, 2023
Wacoal Holdings Corp.

Revised Medium-Term Management Plan Outline

Causes of Deterioration in Profitability (Summary of Group Strategy Committee)

The speed of changes in the external environment were quicker than expected, and weaknesses in our supply chain management have become apparent

- With diversifying customer needs, we recognize that conventional advertising, product planning, and production systems are not enough to respond to market changes, causing deterioration in profitability and excessive inventory (especially with the existing product planning and development lead time (LT), which takes more than one year to market, and improvements are urgently needed).
- As for the harmful effects of functional organizations, various coordinated tasks and complicated profit and loss management hinder prompt decision-making
- The responsibility for the management strategy is not clear, and the effectiveness of the strategy is not improving. In addition, the holding company's supervisory function over its subsidiaries is insufficient, and improvements are needed

Policies of Revised Medium-Term Management Plan

In order to improve the probability of achieving VISION 2030, we will first shift to a structure that can steadily generate cash

- 1. Implementing business model reforms (supply chain management reforms and cost structure reforms) to restore basic profitability**
- 2. Carrying out “brand strategy” and “customer strategy”, utilizing the power of digital resources and our Company's strengths to lead to further growth**
- 3. Introducing ROIC management as business management infrastructure that supports measures to enhance profitability and the effectiveness of strategies**
- 4. Improving capital efficiency by reducing inventories, policy shareholdings, and streamlining real estate holdings**

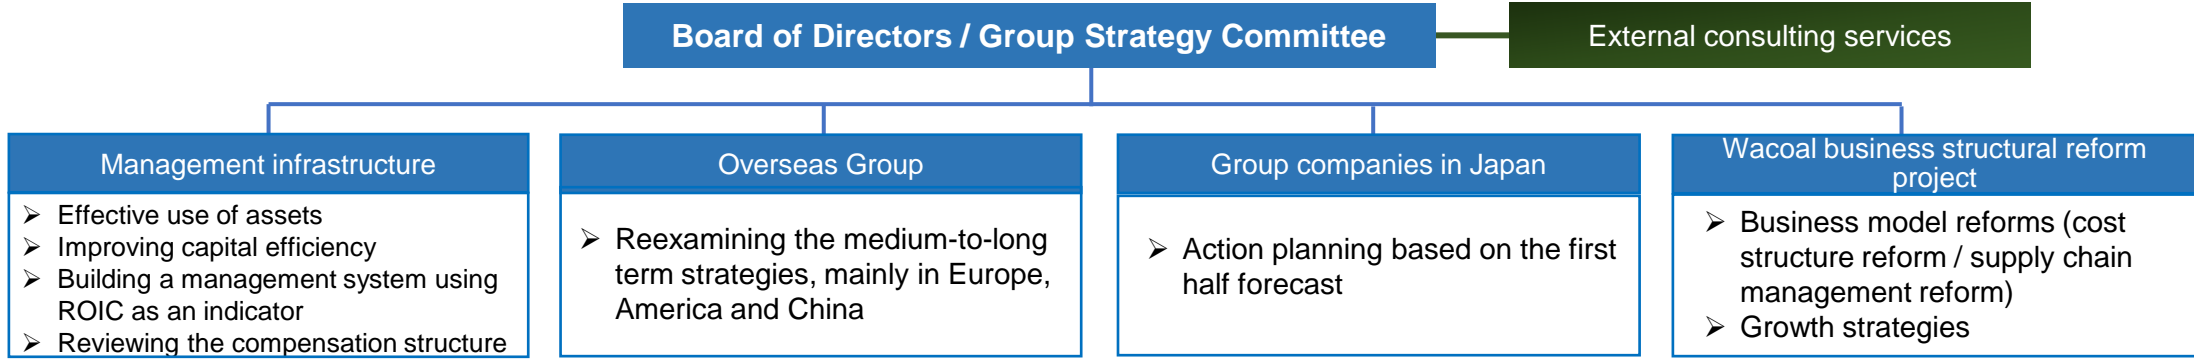

Background of Reviewing the Medium-Term Management Plan

Business performance has been sluggish for a long period of time, continuing to fall short of the medium-term management plan and initial annual plans. Capital efficiency also remains low
 We will review the medium-term management plan and take actions to improve the effectiveness of management

			Approx. ¥ 7.0 billion

Business Model Reform (3) Withdrawing LIVELY brand (IO)

Withdrawing from the LIVELY business of Intimates Online, Inc., a U.S. subsidiary, and liquidating the company

- ✓ Since its acquisition in July 2019, we have developed our business by e-commerce sales as our main sales channel, utilizing new digital media centering on SNS as a communication tool with customers
- ✓ Sales fell short of the plan due to entry by competitors and restrictions on targeted advertising due to heightened restrictions on the use of personal information
- ✓ After considering various possibilities for future business development, we determined that it would be difficult to improve the performance of the business in the future, and decided to withdraw
- ✓ As a result of the withdrawal from this business, approximately ¥ 7.3 billion will be recorded in FY2024, including an impairment loss on goodwill related to Wacoal International (Approx. ¥ 10 billion of impairment loss on goodwill in FY2023)

Acquisition prices

Purpose of introducing ROIC management

Promoting Asset Reduction

The Company's basic policy is to sell any assets that do not contribute to raising corporate value
When selling, we will search for investment opportunities that will contribute to business growth, and determine the businesses that should be invested in from the perspective of ROIC

Implemented items	Specific activities	Goals
Reducing inventories	<ul style="list-style-type: none">● Reducing inventories through business model reforms (supply chain management reform and cost structure reform)● Appropriate disposal of inventory resulting from the withdrawal and consolidation of unprofitable brands	Wacoal: Inventory turnover ratio in FY2026: 2.5 turns
Reducing strategic shareholdings	<ul style="list-style-type: none">● Gradually selling the shareholdings that we have agreed to sell	During FY2024 to FY2026 we will sell approx. ¥ 30 billion of strategic shareholdings (Reducing less than 10% of net assets by FY2026)
Streamlining real estate holdings	<ul style="list-style-type: none">● As for real estate that does not contribute to enhancing corporate value, we will proceed with consideration based on the basic policy of selling	While carefully examining the feasibility and validity, we will gradually respond (starting the phase from FY2024)

Quantitative Targets in the Revised Medium-Term Management Plan

In light of the external environment, initial sales targets have been revised downward. On the other hand, through business model reforms and growth strategies, we will strengthen our ability to respond to customer changes and profitability while striving to improve capital efficiency. In addition, we aim to achieve a ROE of 7% and a PBR of 1 time or more.

	Initial goal FY2025	+1 year	Revised target FY2026	No change FY2031 (VISION 2030)
Sales	¥ 220 billion		¥ 203 billion	¥ 270 billion
Operating income	¥ 16.5 billion		¥ 13 billion	¥ 27 billion
