# Fiscal Year Ending March 31, 2022 <br> First Quarter Business Results <br> Presentation 

## Akira Miyagi

Director and Managing Corporate Officer
Wacoal Holdings Corp.
July 30, 2021
[Speaker]
Akira Miyagi
Director and Managing Corporate Officer in charge of Group Finance

## Changes

(1) Domestic sales of the Peach John brand in China that have been recorded in the Wacoal Business (Overseas) segment to date, will now be recorded in the Peach John Business segment, and past segment results have been retroactively adjusted.
(2) Effective from the current fiscal year, Wacoal China Co., Ltd. sales at department stores, etc. have been changed to state the total amount (based on retail prices at stores). No retroactive adjustments have been made for the impact of this change. (Impact on sales in 1 Q of this fiscal year: 0.613 billion yen

Miyagi: Hello everyone. I am Akira Miyagi, Director and Managing Executive Officer of Wacoal Holdings Corp.
Thank you very much for watching this video presentation of our financial results. Let me explain Wacoal Holdings' financial results for the first quarter of the fiscal year ending March 31, 2022.

Please refer to page 2. First, I would like to explain the changes in accounting standards that will be applied from this fiscal year.

First is the change in the accounting destination for domestic sales of the Peach John brand sales in China.

Previously, this was recorded in the Wacoal Business (Overseas) segment, but from this fiscal year, it will be recorded in the Peach John segment.

Such changes will be retroactively applied, and the figures presented in this report are after retroactive adjustments.

The second is a change in revenue recognition related to Wacoal China. Up to now, sales of department stores, etc., of Wacoal China have been presented on a net basis, but this will be presented on a gross basis from this fiscal year.

The impact of the change on sales of Wacoal China in the first quarter was approximately JPY600 million. This change is not retroactively applied.

```
> There is significant disparity in sales recovery depending on the progress of vaccination and resumption of
economic activities in each country/region
The recovery of the US business contributed significantly to the Group's overall sales and operating income
Operating income improved by ¥6.4 billion thanks to sales growth and profit structure reform efforts
```

Net sales $¥ 42.3$ billion YoY $+¥ 13.8$ billion ( $+48.2 \%$ ) vs $\mathbf{2}$ years ago $-¥ 5$ billion ( $\mathbf{- 1 0 . 6 \%}$ )
> In the US and Europe, sales have recovered to pre-COVID-19 levels due to government support and the easing of COVID-19 restrictions
> Wacoal (Japan) has yet to return to pre-COVID-19 levels as urban stores remain sluggish due to a decline in visitor numbers

## Operating income

$¥ 1.9$ billion YoY $+¥ 6.4$ billion vs 2 years ago $-¥ 1.7$ billion ( $-46.8 \%$ )
> Wacoal (Japan) narrowed its loss thanks to sales growth and cost reduction efforts that are part of profit structure reforms
$>$ In the US, results exceeded those of the same period two years ago thanks to sales growth and improved profit margins at existing businesses, as well as a smaller loss at IO Inc.

## $¥ 1.1$ billion Yoy $+¥ 4$ billion vs 2 years ago $-¥ 0.4$ billion ( $-27.0 \%$ )

> A net valuation loss of $¥ 1.7$ billion was recorded on securities and investments (a net valuation gain of $¥ 0.8$ billion was recorded for the same period last year)

Please refer to page 3. These are the results for the first quarter.
In the first quarter, sales recovered significantly depending on the progress of vaccinations in countries and regions and the resumption of economic activities.

The US performed well on the back of the widespread of vaccines and government economic policies. In Europe, although there are regional differences, there is generally a recovery trend.

On the other hand, in Japan, demand dropped mainly in urban areas due to the issue of the state of emergency and the pre-emergency measures to prevent COVID-19 from spreading.

As a result, net sales totaled JPY42,300 million.
Although sales increased by JPY13,800 million compared to the same period of the previous year which was strongly affected by COVID-19, this was lower than the level of 2 years before, due to the remaining effects of the disease. Operating income totaled JPY1,900 million.

Sales increased by JPY6,400 million from the same period of the previous year due to the effects of increased sales and expense reductions, but as with sales, they have not reached the level of the same period last year.

Income before income taxes was JPY1,100 million. As for securities and investment valuation gains and losses, although the Company recorded a write-down of JPY1,700 million, the results were significantly higher than the same period of the previous year due to improvements in operating income.

Please refer to page 4. As I mentioned earlier, in the first quarter, almost all businesses increased their sales compared to the same period of the previous year, but the degree of recovery varied greatly depending on the country and region.

This page summarizes sales of major subsidiaries in the first quarter of the fiscal year ending March 31, 2020, based on sales in the first quarter of the same fiscal year, the same as we did the previous year.

First, the blue circle on the upper right represents the Group that has recovered to the level of the previous year, that is, the level before the pandemic. The US and Europe, where the consumption environment has improved significantly on the back of the spread of vaccines, have achieved a V-shape recovery.

Peach John was also able to maintain growth in the first quarter, just like it did in the same period last year.
On the other hand, sales for Wacoal have been recovering slowly due to store closures and a decline in the number of customers visiting stores as a result of the prolonged disease.

In addition, Lecien and Nanasai continue to have a severe business environment.
As for Wacoal China, which is displayed on a net basis for comparison with past results, sales were lower than the level of the same period of 2 years before due to the continued struggles in the EC, as the result of the competitive environment with emerging brands.

Please refer to page 5. This is a waterfall summary of the factors contributing to the increase and decrease in sales.

The right side shows comparison with the same period of the previous year, and the left side is the comparison with the same period of 2 years before. As shown by the series of blue boxes on the right, sales increased by JPY13,800 million compared to the same period of the previous year due to the improvement in the business environment in many countries.

On the other hand, as shown in the box on the left, sales in the US, Europe, China, and other overseas businesses increased compared to 2 years before, but sales decreased by JPY5,000 million due to the delay in Wacoal's recovery.

Compared to the same period of the previous year, sales in the US increased by JPY2,400 million, of which JPY800 million was due to the effect of increased sales at Wacoal in the US, and JPY1,600 million was due to the effect of consolidation of Intimates Online, Inc. (hereinafter called IO)

FY 2022 1Q: Increase/Decrease in Operating Income (YoY and vs 2 Years Ago)

Please refer to page 6. On this page, we summarize the factors of increase and decrease in operating income and loss by waterfall.

As with sales, the right side is compared to the same period of the previous year, and the left side is the comparison with the same period 2 fiscal years before. Compared to the same period of the previous year, sales improved by approximately JPY6,400 million as all businesses increased profits due to the effects of increased revenue and cost reductions.

Japan and the United States, made a high contribution to the improvement, and they will be explained in detail on the next page.

In response to the same period of 2 years before, Peach John, which had advanced structural reforms, improved significantly and profit increased in Europe and the US.

However, as with sales, Wacoal's sales, which have been affected by the COVID-19, have declined by approximately JPY1,700 million overall. Wacoal's results compared to that of 2 fiscal years before will also be discussed in detail on the next page.

Please refer to page 7 . I will explain the situation in Wacoal and the US, which had a significant overall impact on the operating income.

The materials show the change in operating income and loss for the first quarter, with Wacoal in the center and the US on the right.

First, please look at the profit and loss trends of the US business. The US business turned a surplus of JPY1,100 million, an increase in profit from the same period last year.

In addition, Wacoal's sales in the US recovered to exceed the level before the pandemic and has also contributed to narrowing IO's deficits.

Next, please look at Wacoal's profit and loss trends. Operating loss for the first quarter was JPY500 million as a result of stores closing which followed the declaration of a state of emergency.

Profit increased by JPY2,000 million from the previous year, and profit decreased by JPY1,800 million from the same period 2 years before. As a result of the decrease in sales, sales income decreased by JPY3,400 million from the same period of the previous year, but the impact of the decrease was mitigated by efforts to reduce expenses by JPY1,600 million.

We will continue our efforts to reduce fixed costs and improve the profitability of unprofitable businesses.

FY 2022 1Q: Reporting by Segment - Wacoal Business (Japan)
Note: The performance report for major subsidiaries is noted in the reference materials (P23~)

Slump, mainly in urban areas, due to the state of emergency declaration and semi-state of emergency COVID-19 measures

Net sales $\quad ¥ 20.7$ billion $\begin{aligned} & \text { YoY }+¥ 5.1 \text { billion }(+33 \%) \\ & \text { Vs } 2 \text { years ago }-¥ 5.9 \text { billion ( }-22 \% \text { ) }\end{aligned}$

$$
\text { Operating loss }>-¥ 0.4 \text { billion } \begin{gathered}
\text { YoY + } ¥ 2.7 \text { billion } \\
\text { (same period last year deficit of - } ¥ 3.0 \text { billion) }
\end{gathered}
$$ (same period 2 years ago profit of $+¥ 2.0$ billion)

## Market environment:

> Closures or shortened business hours at large-scale commercial facilities in major cities (department stores, shopping centers, etc.)
> In addition to the spread of remote work, there is also a strong tendency for people to stay at home, and the number of customers visiting physical stores remains at a low level
> EC was affected by being opposite the same period last year when "stay-at-home demand" increased rapidly in response to the initial state of emergency declaration

## Wacoal business conditions: YoY +33\% Vs 2 years ago -29\%

> Stores: Recovering vs last year, however, the impact of COVID-19 continues to affect urban stores Note: Store-based sales: department stores $+40 \%$ (vs 2 years ago $-38 \%$ ), directly-managed stores $+33 \%$ (vs 2 years ago $-25 \%$ ), mass retailers: Wacoal $+29 \%$ (vs 2 years ago $-20 \%$ ), Wing $+16 \%$ (vs 2 years ago $-21 \%$ )
> Own EC: Struggling to acquire new customers but putting up a good fight Note: Own EC -6\% (Vs 2 years ago +79\%)

## Wacoal's 1Q Initiatives:

> Started a new organization aiming to improve business efficiency and strengthen our ability to respond to changes in purchasing behavior and the distribution structure (April 1~)

Please refer to page 8. From this page, we will review the market environment and results of the first quarter by segment.

Wacoal business had domestic sales of JPY20,700 million. Although sales increased significantly compared to the same period of the previous year, due to the slow recovery in sales of urban stores which got greatly affected by the third emergency declaration in Japan, situation remained difficult, with a decline of JPY5,900 million compared to 2 fiscal years before.

Operating income was a loss of JPY400 million. Although the deficit narrowed compared to the same period of the previous year thanks to the increase in sales and progress in reducing expenses, the profit declined compared to 2 years ago because the sales recovery delayed affected by the prolonged period of COVID-19.

FY 2022 1Q: Reporting by Segment - Wacoal Business (Overseas)

Sales have recovered and exceed pre-COVID-19 levels, mainly in Europe and the US where economic activity has resumed

## Market environment:

- Europe and US: Consumption has rebounded sharply due to government subsidies and a resumption of economic activity resulting from widespread vaccination
> China: Regional consumption is boosted by travel restrictions aimed at preventing the spread of infection. Conversely, emerging brands are gaining ground in the EC market
> Asia: The effects of COVID-19 continue to spread in South and Southeast Asia.

## Business conditions at major subsidiaries (figures are local currency base):

$>$ US: Wacoal America's and IO Inc's EC platforms maintained high growth (Wacoal America $+131 \%$ (vs 2 years ago $+16 \%$ ), IO Inc. $+73 \%$ )
$>$ Europe: Although there are regional differences, the general trend is toward recovery ( $+111 \%$ (vs 2 years ago $+6 \%$ ))
$>$ China: EC struggled due to an intensifying competitive environment caused by the rise of emerging brands
YoY $+83 \%$ (vs 2 years ago $+7 \%$ Note: Excluding the impact of the change to state the total amount: vs 2 years ago $-13 \%$ )

## 1Q Initiatives:

> US: As a part of the Digital First Strategy, the digital measurement app "My Bra Fit" was released

Please refer to page 9. The sales for Wacoal business overseas were JPY16,100 million.
As a result of a significant recovery in sales, particularly in the US and Europe where economic activity has resumed, sales for the total segment exceeded the level before the pandemic.

Although the sales in China increased compared to the previous year partly due to the upward effect of changes in revenue recognitions, EC has struggled from competitive environment with emerging brands, and they have not reached the level of that of 2 years before.

Operating income was JPY2,100 million. This exceeded the level before the pandemic, due to the effect of increased revenue.

FY 2022 1Q: Reporting by Segment - Peach John Business/Other

```
Peach John: Implementation of highly topical promotional measures contributed to an increase in store visitors, and growth was maintained
```

Business conditions in each region:
> Japan: Mainstay products performed well, primarily at directly-managed stores. For EC, the hurdle presented by the
same period last year was high, and sales declined comparatively but remained steady
Note: Directly-managed stores $+91 \%$ (vs 2 years ago -13\%) Own EC $-17 \%$ (vs 2 years ago $+40 \%$ )
> Overseas: Shanghai PJ struggle to attract visitors. Taiwan PJ saw store visitor numbers decline due to the impact of COVID-19

## Other: Sluggish due to the prolonged impact of the COVID-19 pandemic

```
Net sales # #2.6 billion YoY -¥0.032 billion (-1%)
```

## Business conditions of each company :

> Lecien: Sales of private brand products were sluggish due to client restraint on purchase quotas, etc.
> Nanasai: Sluggishness in the construction business due to the cancellation and postponement of new store openings and various events

Please refer to page 10. Sales in Peach John business was JPY3,000 million.
In addition to strong sales of core products that meet the needs of consumers, a recovery in sales at directly managed stores contributed to the increase in sales. Operating income was JPY500 million. In addition to the effects of increased sales, profits increased from the efforts to reduce expenses.

Other sales totaled JPY2,600 billion. With the prolonged period of infectious diseases, both Lecien, Nanasai, and Ai continued to face severe conditions, resulting in sales at the same rate as the same period last year.

Operating loss was JPY300 million. Sales have been sluggish due to COVID-19, but the deficit has narrowed as a result of reviewing operations as part of a revenue structure reform.

## Progress of ESG Initiatives

## Initial calculation of supply chain emissions (scope 3) carried out in an effort to reduce greenhouse gas emissions

## Environment:

> We calculated scope 3 emissions (for the Wacoal business (Japan)) in order to make supply chain greenhouse gas emission reductions more reliable and promote efforts toward the realization of a carbon-free society (reduction targets to be disclosed during the current fiscal year)
> For the first time as a Group, we responded to a survey from the CDP, a non-profit organization (responded in July 2021)

```
About the CDP
The CDP is an international environmental non-profit organization that conducts surveys and analyzes the efforts of
companies and organizations around the world to address environmental issues such as "climate change," "water," and
"forests," and discloses the results of its assessments
CDP'S environmental information disclosure and evaluation process are widely recognized as a global standard in corporate
environmental information disclosure.
```

## Sustainability Promotion Project:

> In April 2021, we launched the Sustainability Promotion Project with the participation of both management and employees, and started discussions on important issues for achieving sustainable growth and increased corporate value, as well as long-terms targets for resolving these issues
$>$ With executive officers serving as leaders, 30 employees in their 20 s and 30 s from Group companies participate in the project

Please refer to page 11. I will explain the progress of ESG initiatives in the first quarter.
For the first time, we have calculated Scope 3 emissions to advance our efforts to realize a decarbonization society and to further reduce greenhouse gas emissions of our supply chain.

In addition, we have responded to a survey by CDP, an environmental NGO, for the first time. We plan to set and disclose greenhouse gas emission reduction targets during the current fiscal year.

In addition, we have launched a sustainability promotion project with the participation of both management and employees, and have started discussions on important issues for achieving sustainable growth and increase corporate value, as well as long-term target values for solving these issues.

## No change in our full-year forecast for the fiscal year ending March 31, 2022

## Risks from the second quarter onwards:

## Upside

> Recovery in consumer activity due to an early lifting of the state of emergency declaration and lockdown measures

## Downside

> Decrease in sales and profits due to the prolonged impact of the COVID-19 pandemic
> Possibility of impairment loss on intangible fixed assets of overseas subsidiaries (*)
> Prolonged closures of production factories (Vietnam factory, etc.) due to the spread of COVID-19 in Southeast Asia
*The impairment loss needs to be reevaluated according to business performance trends in the current fiscal year.
Even if it is actualized, it will not reduce cash flow, so there will be no impact on capital investment or shareholder returns
$\Rightarrow$ If it becomes necessary to revise the earnings forecast going forward, we will promptly disclose such information

Please refer to page 12. There are no changes to the full-year earnings forecast for the current fiscal year at the moment. However, mutated strains of COVID-19 are prevalent around the world, and the future remains uncertain.

The materials list upside and downside risks from the second quarter onwards, but there are also new risks to the possibility of long-term closures at production plants due to the spread of COVID-19 in Southeast Asia. If it becomes necessary to revise the business forecast, we will disclose it promptly.

Basic Policy for Capital Policy in the Current Medium-Term Management Plan (disclosed June 13, 2019)

While prioritizing investment for future growth, we will also strive to enhance shareholder returns
> Achieve ROE of $6 \%$ that exceeds the cost of capital
> Maintain a total return ratio of 100\%
> Reduce cross-shareholdings (Target: 30\% reduction)

Note: In the event of significant fluctuations in business performance or financial demand due to the spread of infectious disease, we will consider reviewing the policy

Please refer to page 13. We will explain capital policy and shareholder returns.
This is the basic principle of capital policy in the current medium-term management plan announced in June 2019. There are no changes to the basic policy currently.

Reference 8: FY2022 1Q Overview of Wacoal (1): Net Sales and Operating Income for Major Business Units
Although sales increased, the scope of consumer activities continued to shrink and store sales struggled; however, the deficit narrowed due to the effects of increased sales and cost reductions

## Net sales $¥ 18.1$ billion YoY $+¥ 4.5$ billion (+33\%) Vs 2 years ago -7.3 billion (-29\%)

Stores in urban areas struggled due to the intermittent issuance of state of emergency declarations and semi-state of emergency COVID-19 measures
. Regarding our own EC platform, sales declined due to the high hurdle presented by the same period last year from "stay-at-home demand" and other factors

## operating loss $>\mathbf{-} \mathbf{¥ 0 . 5}$ billion YoY $+¥ \mathbf{2 . 1}$ billion Vs $\mathbf{2}$ years ago $\mathbf{-} \mathbf{¥} \mathbf{1 . 8}$ billion

> Despite the deficit caused by sluggish sales, losses were narrowed due to the effects of increased sales and cost reduction efforts
(Millions of yen)

## Reference 9: FY2022 1Q Overview of Wacoal International (US)

Both Wacoal America and IO Inc. performed well against a backdrop of growth in consumer spending due to the spread of vaccinations and the payment of government subsidies
Net sales $¥ 7.4$ billion YoY + $¥ \mathbf{4}$ billion (+118\%) Note: YoY change in local currency +116\% Vs 2 years ago +¥2.4 billion (+48\%)
> Wacoal America: Physical store channel $+507 \%$, EC channel $+35 \%$ (Breakdown: Dept. store EC $+114 \%$, Specialty store EC $+27 \%$, Own EC $+8 \%$ )
> IO Inc.: $\$ 14.1$ million (reference value: $\$ 8.2$ million in the same period last year)
Operating income $\mathbf{¥ 1 . 1}$ billion YoY $+¥ 1.9$ billion Note: YoY change in local currency $+\$ 18$ million Vs 2 years ago + $\mathbf{¥ 0} \mathbf{0} \mathbf{2}$ billion ( $+\mathbf{2 7 \% \text { ) }}$
> Growth investment related to our own EC, which is being strategically strengthened, is being increased, and the effect of increased sales and improved profit margins contributed
> Losses at IO Inc. narrowed due to higher sales Note: YoY change in local currency - $\$ 1.8$ million (reference: $-\$ 4.3$ million in the same period last year)

## Reference 10: FY2022 1Q Overview of Wacoal Europe

Although there are regional differences, countries and regions mainly in the US and Europe are generally recovering

> Recovery trends in each region: UK $-155 \%(-11 \%)$, N. America $+130 \%(+29 \%)$, Europe $+89 \%(+12 \%)$ Note: figure in brackets () is vs 2 years ago
> Our own EC channel, which launched in the fiscal year ending March 2020, is also progressing beyond the plan

## Operating income

$¥ 0.6$ billion YoY $+¥ 0.8$ billion Note: YoY change in local currency $+£ 5$ million Vs 2 years ago $+¥ 0.2$ billion ( $+68 \%$ )
> Returned to operating profit due to increased sales
