$>$ Reduce $1 \%$ product discard level to zero. Also, promote efforts to reduce the disposal of leftover materials at factories (target: Wacoal)
> Raise the ratio of environmentally friendly materials used to $50 \%$ (target: Wacoal)
> Targets for reducing greenhouses gases in the supply chain will be disclosed in spring 2022
(For overseas business initiatives, we will start with a survey of our own emissions and set targets when the time is right)

## Promotion of CSR procurement activities

> Along with a fourth update to the contracted manufacturing factories list, we disclosed the list of factories for Une Nana Cool and three overseas subsidiaries for the first time

## Progress toward the full-year plan

Sales: Overall progress lagging due to slump in Japan
> Progress of domestic business and others lagging due to sluggish sales
> Overseas business progressing steadily on the back of economic recovery
Operating income: Overall progress is favorable with overseas and PJ contributing
> Progress in domestic business significantly lagging due to top line decline
> Overseas businesses substantially exceeded the full-year plan, PJ roughly achieved

## Approach to 2 H

Sales: Increasing uncertainty in the business environment, both domestically and overseas
> Positive: Economic recovery due to vaccination and easing of restrictions
> Negative : Concerns about reemergence of COVID-19, decline in consumer confidence
Impact of production shutdown at Vietnam factory (restarted in Oct)
Slowdown in growth overseas (lower growth rate due to inventory sufficiency)
Operating income: Appropriate responses to market environment changes
> Negative: Delayed recovery of domestic business, sales decline due to reemergence of COVID-19 Rising manufacturing costs due to soaring transportation costs and raw material prices

## FY 2022: 2H Risk

## Upside risk

> Recovery in consumer activity due to easing of COVID-19 restrictions
$>$ Additions by curbing SG\&A expenses in domestic businesses
> Increase in sales profit due to higher sales from overseas businesses and PJ business
> Efficient use of idle assets

Downside risk
$>$ Decline in consumer sentiment due to re-strengthening of COVID-19 measures, leading to sluggish sales and a decrease in profits in Japan and overseas
$>$ Further deterioration of the business environment, such as shrinking of existing distribution channels in Japan
> Impairment loss on intangible and tangible fixes assets
$>$ An increase in one-time expenses due to additional cost structure reform measures
$>$ Rising manufacturing costs due to soaring transportation costs and raw material prices
$>$ Loss of sales opportunities due to production delays at manufacturing factories (Vietnam factory, etc.)
Due to the spread of COVID-19 infections in the Asian region, operations at factories in Vietnam and other countries were suspended. Due to production delays and other factors, some new products scheduled to be launched between Sep and Dec were pushed back, and the sales schedule rearranged to mitigate the overall impact.
> Vietnam Wacoal
Locked down in stages from Jul 10, closed until the end of Sep. Resumed operations in stages from Oct 1
(almost operating at 100\% in Late Oct) (Lecien Vietnam resumed operation on Oct 7)
> Myanmar Wacoal:
Although it had been closed for some time due to political instability and COVID-19, it resumed operations in Sep (operating at almost 100\%)
