Despite efforts to implement various measures to achieve sales recovery, the continuation of the severe business environment in 4Q and beyond is anticipated.
> There is a downside risk to the revised plan for sales revenue due to 3 Q results and current business conditions in 4Q.

Aim to achieve the revised plan through thorough cost management
> Strengthen control of SG\&A expenses in line with sales trends
> The decrease from 3 Q cumulative business profit ( $¥ 5.0$ billion) is due to the estimated loss for the 4 Q and the impact of levy adjustment* (approx. $-\neq 1.4$ billion)

* Under Japanese GAAP, property taxes are recognized as an expense over the accounting period in which they are paid, but under IFRS, they are recognized as a lump-sum expense on the levy date.

In addition to the impairment loss related to the U.S. business, structural reform costs of Wacoal Corp. are expected to be recorded in 4Q
> Impairment loss of WIC ( $¥ 7.3$ billion) due to IO's withdrawal from the business
$>$ Structural reform costs ( $¥ 6.0$ billion) for Wacoal Corp. are expected to be recorded in 4Q

## 4. Finance and Shareholder Returns

1. Improving profitability through business model reforms and growth strategies as a top priority, we will reduce inventories and policy shareholdings, and streamline real estate holdings to improve capital efficiency and ROE
2. While prioritizing investments for future growth, we will actively return profits to shareholders to improve capital efficiency

In-house briefings and townhall meetings regarding revised medium-term management plan

Employee opinion of revised medium-term management plan

> Because I learned about the company's plans from the revised medium-tern management plan, I thought that I would give the dspartment general manager my opinicn regarding how the department should move forward. (Employee in their fifties)

It is intating that although there are visibla problems on the frontine, it has been impossible to undertake major company-wide cotimization because there is a focus on optimization of the organization and its parts. I would IVe to see opportunities for communication because I want to work with the senicr management team to sobve problerms. (Employee in ther thirties)

Ithirk that it is only natural to "set out compary-wide poicies, and then have each department break down the policies based on a common understanding and incorporate those ideas into its strategy and operations," but I was sumprised that department general managers and section chiefs cormmented that "plans lack ooncrete details" and questioned "how departmert operations should be organized." | think that they do not understand the meaning of possessing authority. (Employee in their twenties)

I would ike management to tak about such issues as the overal direction, bolstering employee motivation, and an atmosphere in which people move forward whth urity. Athough I understand that tractionaty detaled decisions should te left up to dspartments, I was disappointed that at the briefing, the responses to many of the detaled questions were vague. (Employee in their thirties)

It is good that following the briefings, there were towrhall meetings at which participants could drectly tak with the executive management team. This provicied an opportunity to consider the role of one's own department as seen from the overal company and based on the stated policy. (Employee in their thirfies)

## Sales of high-end products and men's products were strong, but sales in the main brands slowed down, falling short of the plan and YoY

$>\quad$ While sales of high-end brand and men's products were firm, the mainstay "Wacoal" and "Wing" struggled
$>$ By channel, EC sales grew both Wacoal and other companies EC, but physical stores were sluggish, mainly in department stores and mass merchandisers, which are the mainstay channels

## Exceeded YOY due to a decrease in personnel expenses and advertising expenses

$>$ Significant decrease in personnel expenses due to the implementation of special operation of the flex retirement system in the previous fiscal year
$>$ The sales profit ratio decreased due to an increase in the bargain sales ratio in order to reduce inventories, mainly at directly managed stores
